### **DETAILED ACTION**

1. Claims 1-60 are presented for examination.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The current title is imprecise.

#### ***Claim Objections***

3. Claims 2-20 and 42-60 are objected to because of the following informalities:

In claims 2-20, line1, "a method" should be --the method--;

In claims 42-60, line1, "a computer program product" should be --the computer program product --.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 41-60 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 41-60 merely manipulates an abstract idea without producing a useful, concrete and tangible result. The claimed invention in claims 41-60, which comprises computer program (software), is not tangibly embodied on a computer readable storage medium. For examination purposes, the claims are interpreted as a computer readable storage medium comprising the program.

#### ***Allowable Subject Matter***

5. Claims 1 and 21-40 are allowed over prior art.
